6' x 8' Projection Screen – Fastfold

Parts

- (1) Carrying Box
- (1) Frame
- (4) Legs
- (4) Cranks
- (1) Front or Rear Projection Screen with soft case

Important Precautions

- Never let the screen surface touch the ground/floor.
- When putting away in its box, the screen surface **MUST BE ON TOP** of the metal frame.
- When using outside, you will need something to weight down frame legs.
- We recommend a minimum of two people for proper set up.

Set Up Instructions

- Unfold frame and lay flat on ground, snap side up. Tighten the mid joints, leaving the corners unlocked.
- Snap on screen, leaving corners unsnapped until the very end.
- Prepare legs in the same manner (open and tighten mid joints) and set to desired height.
- There are 4 cranks that fasten through holes in the legs and into grommets on the screen surface, crank until snug. Do not over tighten.

Break Down Instructions

- Take apart screen in reverse.
- ***Do not forget to remove the cranks before breaking down.***
- ***Place screen on TOP of frame/legs in box.***
