Champagne Fountains

Our champagne fountains are easy to use and to clean.

To Use:

Simply pour your liquid into the bowl/basin of the fountain and plug in/turn on.

To Clean:

Pour out your liquid and run water through the fountain for a few minutes. Wipe down any sticky residue from the outside of the basin. This is the only cleaning necessary.

****IMPORTANT****

*Do not use **ANY** liquids with pulp or floating ingredients as this can damage the champagne fountain motor and result in replacement charges.*
